Fast and easy operation, without extensive training required
- **Individual**
Simple, personalized use
- **Precise**
Fast and precise presetting and measuring of all kinds of cutting tools
- **Clear**
Clear structure without pop-ups and sub-menus, self-explanatory function buttons

Innovative image processing with modern touch function

The modern ZOLLER myTouch user technology »pilot 2 mT« continues the proven success of the innovative image processing software from ZOLLER. The modern touch function impresses not only for its intuitive handling, but also for its customizable settings. Users can quickly and easily move individual windows with swiping motions. Each user can also arrange display dialogs on the main screen in custom order, and arrange them differently for specific measuring tasks.
